

International
Alliance against
Health Risks in
Wildlife Trade

Breaking Barriers: Advancing the One Health Agenda with a Focus on Environment

Keynote Speech Dr. Michael Nagel

Initiated by

Federal Ministry
for Economic Cooperation
and Development

Federal Ministry
for the Environment, Nature Conservation
and Nuclear Safety

Implemented by

giz Deutsche Gesellschaft
für Internationale
Zusammenarbeit (GIZ) GmbH

Goals of the Alliance

The specific goals are:

1) "Substantially **reducing the risks of zoonotic spillover** and stepping up responses (including behavioral changes) to human and animal health risks caused by direct and indirect contact with wildlife and their products along the wildlife trade chain."

and

2) "Enhancing international and national awareness, knowledge and policies with regard to goal 1, thus **narrowing the gap between science and implementation**

Nexus Wildlife trade - Health

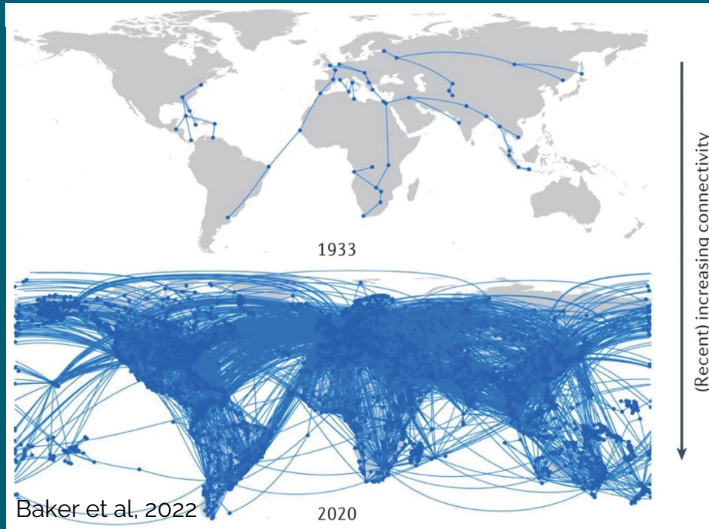

- Emergence of zoonotic pathogens from wildlife due to:
 - animal / human interface: consumption and wildlife trade are associated with spillover risks

- increased contact: land-use changes / habitat destruction

Nexus Wildlife trade - Health

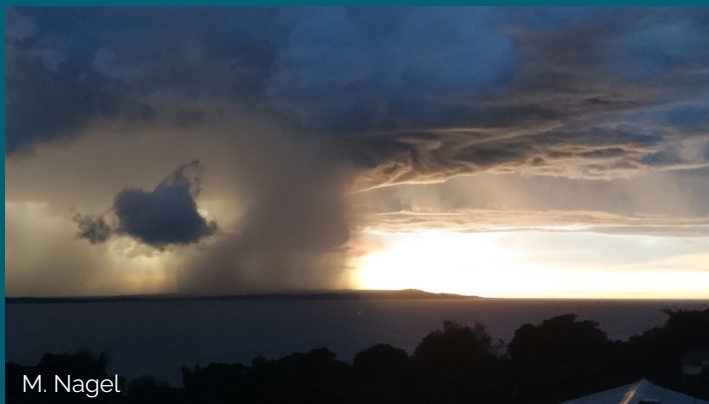

Faster spreading:
Human connectivity

Late detection:
Weak health systems

Climate change leads
e.g. to vector expansion
